40 years of quality.

Dear customers,

For more than 40 years Schuller Eh`klar clearly established itself as a quality supplier in the field of painting tools and accessories. This is mainly possible due to the continuous improvement of all product ranges.

The slim product range, under consideration of price and quality, is a competitive advantage and the long-lasting success criteria of our customers. In the future, the quality of tools continues to grow in importance. Brands are clearly in advantage over no-name products and we see ourselves as a competent partner with the necessary know-how.

We wish you good business with the new Schuller catalogue and thank you very much for the long-term partnership.

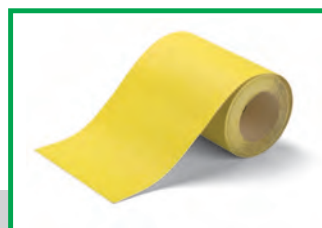

Kind regards,

Daniel Brandstetter

Christoph Schuller
